Art Unit: 2116

DETAILED ACTION

1. Claims 1-18 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, 5-8, 13 and 15-16 are drawn to Invention I, classified in class 713, subclass 324.
 - II. Claims 3-4, 9-10, 14 and 17-18 are drawn to Invention II, classified in class 713, subclass 324.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as reducing power consumption by limiting a current while continuously driving the light-emitting unit, while invention II has separate utility such as reducing power consumption by controlling the number of light-emitting units, independent of the location of the data to be displayed. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2116

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Allowable Subject Matter

5. Claims 1-2, 5-8, 13 and 15-16 are allowed.
